

Notes on Data 101

Martin Gleason, MS

Learning Objectives:

To become fluent with the language of data To become familiar with the fundamentals of our data What we collect, why we collect it, and what we can do with it To discover what you want to learn next

Training Ground Rules

Take care of your clients and cases Two breaks are built in, but get up and go if you gotta Ask questions, even ones that seem obvious Be willing to be challenged

Fundamentals of Data

Think of data and information as a new language that requires fluency

Slide by slide comparison of Data and Language
